Manager and staff in Procurement Department 4. Manager in Product Design Development: 5. Strategic and Top Management in the Manufacturing Industry

Contents of Training

This course will promote activities toward carbon neutrality by acquiring the following techniques and knowledge.

1. Acquire general knowledge in dealing with environmental issues related to CFP
2. Basic knowledge regarding the description of LCA (Life Cycle Analysis)
3. Expertise in describing business processes including production processes using LCA
4. Basic knowledge for calculating CFP from defined LCA
5. Skills in formulating a supply chain strategy that includes investment costs regarding Scope 3 in the required CFP

Expected Training Benefits

1. By being able to carry out CFP calculations in-house, which previously had to be outsourced, we are able to make overwhelming recommendations on CFP calculation costs.
2. By understanding CFP based on LCA, it is possible to clarify points to work towards carbon neutrality.
3. Employees in the environmental department can understand the actual activities of the division by writing their own LCA. This makes it possible to promote operational reform guidance for activities within the business from the perspective of the environmental department.
